Create a ZIP file

Find three small images on the web (each less than 100KB) and create a ZIP file containing just those three images, along with your affirmation as a Notepad or TextEdit plain text file (see Canvas regarding the affirmation). Be sure that the image sizes displayed in the OS is each less than 100KB (HINT: if it's close, get a smaller image) and that you have used a plain text file for your affirmation, not a Word document. The files can be contained within a folder in the ZIP file, if you wish.

To learn how to create a ZIP file, review the help documents in the Q&A folder of the Files section on Canvas:

[ZIP_make_on_mac.pdf](#)

[ZIP_make_on_win.pdf](#)

Submit your ZIP file on Canvas.
